

Clima neutrality in the making

Learning from Prato and Bergamo

THURSDAY 23rd MAY 2024 2.30 pm
Via Durando (Campus Bovisa) Building B8 Room B8 0.1

The imperative for immediate and comprehensive action to address climate change is undeniable, particularly at the urban level. Within the framework of the European Union's Climate Neutral and Smart Cities Mission, municipalities are actively crafting action plans encompassing a spectrum of mitigation and adaptation measures leveraging on local specificities in spatial configuration, infrastructure, regulations, governance, and societal behaviors. Despite these concerted efforts, numerous hurdles impede cities from achieving easy and large success. The seminar will explore two Italian experiences that will be discussed with partners of two European Projects, namely [NetZeroCities](#) and [Climaborough](#).
