

**POLITECNICO**  
MILANO 1863  
DIPARTIMENTO DI ARCHITETTURA  
E STUDI URBANI

**Urban Design Studio / AY 2024/2025**

**Professors Grazia Concilio and Patrizia Scrugli / Teaching assistants Elena Acerbi and Talita Medina Amaral**

The Studio explores the fields of action of urban planning within current contexts characterized by a socio-economic transition that raises new questions about technical knowledge and its tradition. In the Studio, therefore, new forms of urban planning, useful in addressing the emerging problems of contemporary territories, are experienced. The aim is to construct a clear understanding of the problematic frameworks of design alternatives and to test relations between the spatial transformation and the regulatory dimension of urban design. Finally, the Studio focuses on the crucial issue of place identity in a time in which new life cycles need to be imagined within a perspective of sustainable development and reclaim of public space.
